DETAILED ACTION

1. This Office Action is a response to the amendment dated 01/03/06. Claims 1-8, 10-13 and 15-24 are pending in the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 22-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Beach et al (USP 6,404,772) (hereinafter "Beach").

Regarding **claims 22-23**, in accordance with Beach reference entirety, Beach discloses a method of transmitting packet of a wireless network (*Fig. 1 or 12b and corresponding description at col. 13, lines 16-43*), comprising:

prioritizing the packets according a type of packet (*col. 3, lines 1-2 and thereafter*);

preempting packets of a first priority with packets of a second priority when packets of the second priority are detected (*col. 3, lines 2-9 and thereafter*); and

storing the preempted packets in a buffer for later transmission (*col. 3, lines 9-10 and thereafter*).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Beach.

Regarding **claim 24**, in addition to features recited in base claim 23, Beach discloses management packets have highest priority, voice packets have next highest priority and other/data packets have lowest priority. Beach fails to disclose the highest priority packets are the video packet. However, such limitation lacks thereof from Beach's teaching is well known to a skilled artisan. From the Beach's teaching, a skilled artisan would have contemplated replacing or implementing video packets in place of management packets to support multimedia communications.

Thus, it would have been obvious to those skilled in the art at the time of the invention was made to replace or implement video packets in place of management packets to arrive the claimed invention with a motivation to support multimedia communications.

Allowable Subject Matter

4. Claims 1-8, 10-13, 15-21 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
